MINUTES OF A SPECIAL MEETING OF THE GOVERNING BOARD OF THE INTERMODAL CONTAINER TRANSFER FACILITY JOINT POWERS AUTHORITY HELD AT THE SILVERADO PARK COMMUNITY CENTER AT 1545 WEST 31<sup>ST</sup> STREET, LONG BEACH, CALIFORNIA 90810, ON WEDNESDAY, OCTOBER 21, 2009, AT 6:00 P.M.

# **Board Members present:**

Cindy Miscikowski, Port of Los Angeles Geraldine Knatz, Port of Los Angeles Nick Sramek, Port of Long Beach Richard D. Steinke, Port of Long Beach

#### **Board Members absent:**

None

## Also present:

Mike Christensen, Port of Los Angeles Doug Thiessen, Port of Long Beach Sam Joumblat, Port of Long Beach Thomas A. Russell, General Counsel

# VICE CHAIRPERSON SRAMEK PRESIDED AS CHAIR.

# APPROVAL OF MINUTES

Board Member Steinke motioned, seconded by Board Member Knatz and unanimously carried, the minutes of the special meeting of March 4, 2009, were approved.

#### **NEW BUSINESS**

1. ELECTION OF CHAIR AND VICE-CHAIR FOR FY 2009-2010.

Communication from Douglas Thiessen, Executive Director, dated October 16, 2009, recommending the Governing Board elect a Chair and Vice Chair of the ICTF Governing Board for FY 2009-2010, was presented to the Governing Board.

Board Member Miscikowski motioned, seconded by Board Member Steinke, that Nick Sramek be elected as Chair of the Governing Board for FY 2009-2010. Carried by unanimous vote.

Board Member Sramek motioned, seconded by Board Member Knatz, that Cindy

Miscikowski be elected as Vice Chair of the Governing Board for FY 2009-2010. Carried by unanimous vote.

Newly elected Chairperson Sramek presided as Chair for the remainder of the meeting.

2. FISCAL YEAR 2009-2010 ANNUAL BUDGET – ADOPTED.

Communication from Douglas Thiessen, Executive Director, dated October 19, 2009, recommending the Governing Board adopt the 2009-2010 budget in the amount of \$5,301,306, was presented to the Governing Board.

Board Member Knatz motioned, seconded by Board Member Steinke, that the item be approved as recommended. Carried by the following votes:

AYES:

Members: Knatz, Steinke, Miscikowski, Sramek

NOES:

None

ABSENT:

None

3. DISTRIBUTION OF FUNDS – APPROVED.

Communication from Douglas Thiessen, Executive Director, dated October 19, 2009, recommending the Governing Board Authorize distribution of \$8,000,000 to be shared equally by the Port of Long Beach and the Port of Los Angeles, was presented to the Governing Board.

Board Member Miscikowski motioned, seconded by Board Member Knatz, that the item be approved as recommended. Carried by the following votes:

AYES:

Members: Knatz, Steinke, Miscikowski, Sramek

NOES:

None

ABSENT:

None

4. FINANCIAL AUDIT REPORT – FISCAL YEAR ENDED JUNE 30, 2008 – RECEIVED AND FILED.

Communication from Douglas Thiessen, Executive Director, dated October 19, 2009, recommending the Governing Board receive and file the financial audit report for the fiscal year ended June 30, 2008.

Board Member Steinke motioned, seconded by Board Member Knatz, that the item be approved as recommended. Carried by the following votes:

AYES:

Members: Knatz, Steinke, Miscikowski, Sramek

NOES:

None

ABSENT:

None

5. DRAFT NET FACILITY REVENUE REPORT FOR ANNUAL PERIOD ENDING NOVEMBER 1, 2008 – RECEIVED AND FILED.

Communication from Douglas Thiessen, Executive Director, dated October 19, 2009, recommending the Governing Board receive and file the draft net facility revenue report for the year ended November 1, 2008.

Board Member Miscikowski motioned, seconded by Board Member Steinke, that the item be approved as recommended. Carried by the following votes:

AYES:

Members: Knatz, Steinke, Miscikowski, Sramek

NOES:

None

ABSENT:

None

### OTHER BUSINESS

Rick Cameron, Director of Environmental Planning from the Port of Long Beach and Ralph Appy, Director of Environmental Management from the Port of Los Angeles, gave an update to the JPA board on the status of preparation of the Intermodal Container Transfer Facility (ICTF) Environmental Impact Report (EIR).

The following individuals spoke regarding the Proposed ICTF Modernization Project:

John Cross, West Long Beach Association
Elena Rodriguez, West Long Beach Resident
Yolanda Lopez, West Long Beach Resident
Maria Reyes, Long Beach Resident
Roberto Reyes, Long Beach Resident
Ben Rockwell, Long Beach Resident
Evelyn Knight, Westside Association & Interfaith Community Organization
James Larson, West Long Beach Resident
Angelo Logan, West Long Beach Resident
Mary Hernandez, West Long Beach Resident
Jesse Marquez, Executive Director, Coalition for a Safe Environment

Public comments referenced on the attached California Deposition Reporters transcription report.

### **ADJOURNMENT**

At 7:50 p.m., Board Member Knatz motioned, seconded by Board Member Steinke, that the meeting be adjourned sine die.

# JOINT POWERS AUTHORITY GOVERNING BOARD

of the

INTERMODAL CONTAINER TRANSFER FACILITY

SPECIAL MEETING

WEDNESDAY, OCTOBER 21, 2009
SILVERADO PARK COMMUNITY CENTER,
LONG BEACH, CALIFORNIA

1	MR. SRAMEK: I'd like to welcome everybody to				
2	Silverado Park on the west side of Long Beach, my home				
3	park had to say that and welcome you to the ICTF				
4	JPA meeting.				
5	What I'd like to do is first of all, I'd just				
6	like to welcome my colleagues from Port of L.A.,				
7	president of the Port of L.A., Cindy Miscikowski.				
8	Welcome to the board.				
9	Okay. Madam Secretary, could we have the roll				
10	call, please.				
11	SECRETARY: Board member Steinke.				
12	MR. STEINKE: Here.				
13	SECRETARY: Board member Sramek.				
14	MR. SRAMEK: Here.				
15	SECRETARY: Board member Miscikowski.				
16	MS. MISCIKOWSKI: Here.				
17	SECRETARY: Board member Knatz.				
18	MS. KNATZ: Here.				
19	SECRETARY: We have a quorum.				
20	MR. SRAMEK: Okay. Thank you.				
21	We have minutes from the previous meeting. Has				
. 22	everybody seen the minutes? Okay. Let's get a motion				
23	to approve.				
24	MR. STEINKE: Move to approve.				
25	MS. KNATZ: Second.				

1 MR. SRAMEK: Okay. We have a motion and a 2 second. Any corrections, any comments on the minutes? Seeing none, we'll have a vote. All in favor, 3 say aye. 4 Aye (all). BOARD MEMBERS: MR. SRAMEK: Thank you. We'd like to have -- the public is 7 invited to address the commission at this time. So what 8 we'd like to do is everybody who is going to speak 9 10 hopefully signed a speaker card or will go back and sign 11 up on the speaker card. 12 And what we'd like to do is since, I think, 13 most people are here to speak on Item 6, we'd like to 14 hold those people who are going to speak only on Item 6 after the presentation on Item 6. 15 What we'd like to do is we'd like to call Mr. 16 17 Thiessen and ask if there is anybody who wants to make 18 general comments or comments on any other business at 19 this time. 20 MR. THIESSEN: Mr. Chairman, can you hear me 21 all right? We have a number of speaker cards. Most of 22 the comments did not indicate --23 MR. SRAMEK: Can you move the microphone a 24 little bit better?

MR. THIESSEN:

25

How is that? A little better?

Page 4 Page 6 MR. SRAMEK: Yes, thank you. former Executive Director of the Port of Long Beach's 2 MR. THIESSEN: None of the comment cards except chief financial officer, Sam Joumblat, is sitting behind 3 for one of them mentioned the item that they wanted to 3 me to answer any other questions on the agenda. The speak on, so I'm assuming that most of them are on Item recommendation is for the board to approve the budget as Number 6. 5 proposed. 6 MR. SRAMEK: Okay. Is this on? Okay. 6 CHAIRMAN SRAMEK: I just have a question in 7 here. It looks like from our adopted budget last year Can I just ask, Is there anybody who wants to 8 make comments as general public comments or comments on to what the estimated actual is mostly due to the delay Items 1 through 5, and not Number 6? Anybody? Okay. of the EIR and other things that go along with the EIR; 10 Seeing none, okay, we'll go on with the meeting 10 is that correct? 11 11 then. And what we'll do is we'll have public comments MR. THIESSEN: Yes, that's correct. The large 12 on Item Number 6 after we have made the presentation. 12 portions of the funding that had been approved in the 13 Okay. Our first item of business is election previous year's budget are shifted to the proposed 14 of officers for the fiscal year 2009-2010. Any 14 budget to include the preparation of the EIR. 15 nominations? 15 CHAIRMAN SRAMEK: Okay. Are there any other MS. MISCIKOWSKI: I would like to nominate 16 16 questions? 17 Mr. Sramek as chair of the JPA. 17 MS. MISCIKOWSKI: Yes, I just noticed in the 18 MR. SRAMEK: Thank you. Is there a second? 18 '08-'09 budget, the \$1.9 million for capital 19 MR. STEINKE: Second. improvements for the City of Carson. Was that just a 20 MR. SRAMEK: Okay. Any comments? Okay. carry-over, or was it a second amount? 21 Hearing none, we have a motion and second. All 21 MR. THIESSEN: It's a carryover. 22 in favor, say aye. 22 MS. MISCIKOWSKI: And do we have any estimation 23 BOARD MEMBERS: Aye (all). 23 as to whether or not or how that is to proceed just like 24 CHAIRMAN SRAMEK: Motion passes. the rebuild issue? 25 Okay. I'd like to elect or nominate 25 MR. THIESSEN: The Carson folks have had some Page 5 Page 7 Ms. Miscikowski for vice chair. delays caused by the preparation of the environmental 2 MS. KNATZ: Second. documents, so we've carried this over for a number of 3 CHAIRMAN SRAMEK: Okay. Thank you. years, and I have not had any new information on the 4 We have a motion and second. All in favor, say expectation in that expense. Thank you. 5 aye. CHAIRMAN SRAMEK: Does this answer the 6 questions? BOARD MEMBERS: Aye (all). 6 7 CHAIRMAN SRAMEK: Motion passes. Thank you. 7 MS. KNATZ: I move the approval of the budget. Okay. Do we have any other officers? That's 8 CHAIRMAN SRAMEK: Is there a second? it? Okay. 9 MR. STEINKE: Second. 10 Okay. The next is recommendation to adopt an 10 CHAIRMAN SRAMEK: Okay. Thank you. 11 annual budget for fiscal year 2009-2010. Mr. Thiessen. 11 Any comments on the budget? Okay. 12 MR. THIESSEN: Thank you, Mr. Chair. The 12 Seeing none, we'll have a vote. All in favor, proposed budget for 2009-2010 is in the amount of 13 say aye. \$5.3 million. The majority of the budget costs are 14 BOARD MEMBERS: Aye (all). proposed in the amount of \$3.3 million primarily for 15 CHAIRMAN SRAMEK: Motion passes. Thank you. 16 legal and consultant services in connection with the 16 Okay. The next is recommendation to approve proposal to modernize the ICTF in the application distribution of funds for year '08-'09. Mr. Thiessen. 18 18 prepared by Union Pacific Railroad. MR. THIESSEN: Thank you. The recommendation 19 The larger, other portion of the budget is 19 of distribution of funds accounts for revenues that have \$1.9 million which is being held in reserve for the City 20 been placed into the account -- reserve account for the of Carson for certain capital improvements on the street 21 ICTF balance. As is customary, the governing board 22 adjacent to the ICTF. There are additional votes for distribution of these funds. There is a sum 23 miscellaneous expenses itemized in the proposed budget 23 of \$8 million available for distribution which would be 24 on the attachment. equally distributed to the Port of Los Angeles and Long 25 I'm available to answer any questions. Your Beach, and there is a recommendation for the governing

Page 8 Page 10 1 board to authorize a distribution of funds in the amount 1 file the financial audit period prepared by Macias Gini 2 of \$8 million. and O'Connell for the fiscal year ending June 30th, 3 3 CHAIRMAN SRAMEK: Thank you. Any questions or 2008. comments that you would like to generate? CHAIRMAN SRAMEK: Thank you. Any questions? MR. STEINKE: I would just like to ask, Does 5 5 MR. STEINKE: I have a question just on 6 this leave a balance sufficient to -- for operating container volumes. Are the container volumes at ICTF expenses and to carry over for business for the coming basically following what the predictions are at the two 8 year? ports, or does the volume look like they're staying up 9 MR. THIESSEN: Yes, that's correct. Each year better than -- the decreases are less than the volume 10 there's an accrual, and we do leave an ending cash 10 predictions? 11 balance of approximately \$3 million to carry on routine 11 MR. THIESSEN: Yes. What I wanted to -- I 12 business for the coming year. 12 would caution you that this is the reporting period 13 CHAIRMAN SRAMEK: And that includes everything 13 ended June of 2008, so next year when we come back for a 14 similar reporting period, it's likely these numbers will for the EIR and everything that will come up? 14 15 MR. THIESSEN: Yes. 15 show even further decline. 16 16 CHAIRMAN SRAMEK: Thank you. Yes. This 5 percent or 4.9 percent decrease 17 Do you have any other questions? Okay. 17 largely mirrors the reduction in container volumes seen 18 Could I have a motion to approve the 18 in both ports during this reporting period. 19 distribution of funds? 19 CHAIRMAN SRAMEK: Thank you. Any questions? 20 MS. MISCIKOWSKI: I move. 20 Okay. Seeing none, could I have a motion to 21 CHAIRMAN SRAMEK: Is there a second? 21 approve the audit? 22 MS. KNATZ: Second. 22 MR. STEINKE: Move to approve. 23 23 CHAIRMAN SRAMEK: Thank you. Okay. MS. KNATZ: Second. 24 Any comments on this item, Item Number 3? 24 CHAIRMAN SRAMEK: Thank you. Okay. Any 25 Seeing none, we have a motion and second. All 25 comments on the audit? Page 9 Page 11 in favor of the motion, say aye. Seeing none, we have a motion and second. All 2 BOARD MEMBERS: Aye (all). in favor of the motion, say aye. 3 CHAIRMAN SRAMEK: Thank you. The motion 3 BOARD MEMBERS: Aye (all). 4 passes. 4 CHAIRMAN SRAMEK: Motion passes. Thank you. 5 The next item is the financial audit. 5 Okay. Recommendation to receive and file 6 Mr. Thiessen. 6 Agreed-Upon Procedures for year ending November 1, 2008. MR. THIESSEN: Thank you. Macias Gini and Mr. Thiessen. O'Connell, the outside auditor, has completed its MR. THIESSEN: Thank you. And this is the last financial audit for the fiscal year ending June 30th, of the Board administrative items of the file. Again, 2008. There should be an attachment to your board item 10 Macias Gini and O'Connell have completed their review of 11 with a copy of the audit. ICTF net revenues, and this is for the year ending 12 Some of the summary of the audit concludes that 12 November 1st, 2008, so it's a little different reporting 13 the operating revenues for fiscal year decreased 13 period -- revenues versus the container volumes. approximately 6.2 percent in the amount of \$8,339,856. 14 In this report there were 633,953 gross Net assets increased to \$24,151,671 net, primarily due 15 container moves generating \$19,018,590 in gross revenue. 16 to the large delay in the distribution of cash in the This was a year-over-year decrease of 10.5 percent from 17 previous year. 17 2007. The ICTF collects gate fees, less allowable 18 Container volumes for the San Pedro Bay Ports, 18 deductions resulting in a net facility revenue of 19 as many of us are keenly aware, have decreased 19 \$15,141,358 to be equally shared by the Authority and approximately 5 percent to a total of 15.1 million TEUs 20 the Union Pacific Railroad. On November 5th Union for the 12-month reporting period ending in June of 21 Pacific transferred 50 percent of that or \$7,570,679 to 2008. There was a consequent decrease in volume through 22 the ICTF investment account, accounting for 50 percent the ICTF -- 4.9 percent in container volumes are down to 23 of these revenues. 24 679,993 containers. 24 Final draft of the net facility revenues report 25 We're recommending the JPA board receive and is attached. The auditors and the JPA staff have

Page 12 Page 14 1 reviewed this and are in agreement that the results were to the JPA board on the status of preparation of the recommended that the governing board receive and file EIR. As you're aware, AQMD has been retained by the JPA 3 the draft net facility revenue report for the year 3 to prepare the environmental document, and members of ending November 1, 2008. their staff are also in the audience. CHAIRMAN SRAMEK: Thank you. Can we have a I'm going to turn the microphone over to 6 Ralph Appy, Dr. Ralph Appy from the Port of Los Angeles, motion to receive it, please? 7 MS. MISCIKOWSKI; I have a question. How is it and Rick Cameron from the Port of Long Beach to give an that this report is based on the different year model update on the status of the EIR. 9 than the audit, and is this something that is done every Following that, we have numerous speakers who 10 year, or is this a one-time necessary basis? 10 would like to make comments on this item, and at that 11 MR. THIESSEN: I'm going to ask Mr. Joumblat to time I would read their names from the comment cards, 12 answer that question. I have a similar confusion on the 12 match them as they come up to the microphone. 13 different reporting periods. 13 CHAIRMAN SRAMEK: Thank you. Just remind 14 MR. JOUMBLAT: Exactly. That's the way it has 14 anybody who hasn't signed up, if you want to speak, 15 always been done. Contractually, that is what's 15 please fill out a speaker card, and have someone bring 16 16 required. As of November 3rd and then immediately after it up here. Okay. Thank you. 17 that, we make specific transfer of funds to the JPA so 17 DR. APPY: Thank you, Commissioners. I'm 18 that is consistent with November 1, and that is Ralph Appy. I'm the environmental director for the Port 19 contractually the way it's been done in the past. 19 of Los Angeles, and with me is Rick Cameron, my 20 20 MS. MISCIKOWSKI: But our audit report is done counterpart. We -- the connection here is that we serve 21 from fiscal year ending June 30th; that's July to June. 21 as staff, technical staff to the JPA. And so all the 22 MR. JOUMBLAT: That's correct, and the auditors 22 EIR preparation, therefore, goes through our staff for 23 continue their efforts beyond the -- typically the audit 23 technical review. It comes to us, and we review it, and 24 starts late anyway. That has been the tradition, but 24 we coordinate that work as kind of project manager. 25 the auditors look at the year ending June 30th, and they 25 And so I'd like to add to that. Recently we Page 13 Page 15 1 look at differently and agree upon procedures, and they did have a staff change here, and then we have present look at as of November 1st for verification of the here tonight -- magnetic interference -- we have Lisa 3 revenue, the gate fees, and make adjustments as of that 3 Ochsner here in the audience, if she would stand up. 4 date. 4 She is the technical project manager for JPA, and she 5 MS. MISCIKOWSKI: Okay. 5 actually is staff in my office, Port of Los Angeles. So 6 CHAIRMAN SRAMEK: Okay. Do you have any other she is the one that has actually been doing the 7 questions? No? Okay. day-to-day coordination between the port and staff and Let's see, we have a motion and second already; between the consultant at the AQMD. And she has a lot 9 correct? Can we have a motion and a second? of experience, not only in CEQA, but also she is working 10 MS. MISCIKOWSKI: I'll move. 10 on the SCIG project for the Port of Los Angeles which

CHAIRMAN SRAMEK: Okay. Thank you. We have a motion and second. Any comments on this item?

Seeing none, we have a motion and second. All in favor of the motion, say aye.

BOARD MEMBERS: Aye (all).

CHAIRMAN SRAMEK: Motion passes.

Okay. Item Number 6. This is what we're here for. The staff report and the preparation of the EIR for the proposed ICTF modernization project. Are you going to speak to that, Mr. Thiessen?

MR. THIESSEN: Yes, thank you. Tonight we have here our members of the staff of both the Ports of Los Angeles and Long Beach environmental planning

divisions. They are going to be giving an oral update

11 has a lot of synergies.

So that is one of our big issues, making sure that those two documents are done using the very same assumptions, and also that we have a similar analysis, and we have very similar documents. We, also by the way, are planning on having those documents come out approximately the same time, so we think that's totally necessary.

CHAIRMAN SRAMEK: Do you have an idea when that is?

DR. APPY: Yes, I was going to get to that. CHAIRMAN SRAMEK: That's okay.

DR. APPY: Kind of a status approach on this is that the EIR is being worked on. We have a lot of the main sections already written in draft form.

Page 16

12

13

14

16

17

19

20

21

23

24

So the EIR preparation has kind of a status report on where that is. We have many of the sections done. Drafts sections are in and are being reviewed. But there are two main sections that are ones that will have the longest lead time, and those are traffic, air quality, and noise. Those are the two biggest sections that will take us the longest to do.

So the analysis of the air quality -- they all rely on the traffic analysis. And so recently we did have some changes in the cargo forecast, so we're still looking at a high capacity number, but we had to change some of our traffic modeling. And so we've now completed that, and so we now have the task of doing largely a lot of the actual CEQA preparation of the chapter for the transportation but also the air quality analysis, and that is the big lead final item. And so right now we're anticipating taking into account that

on the traffic side. Where does that come from? Who's 2 done that analysis?

DR. APPY: It's not necessarily new. It's an analysis, a reanalysis looking at the cargo projections.

MS. MISCIKOWSKI: New cargo projections.

6 DR. APPY: And also more than that, there are some intermediate years that we have to analyze. So we ran all that information a second time or probably a third time, and that forms the basis for the rest of our 10 analysis, typically the air quality. That information, 11 by the way, is generated in coordination with both ports

12 based on the overall cargo through-put of the port under 13 the old projections and new projections. 14

MS. MISCIKOWSKI: And given that two EIRs are 15 being done simultaneously by two different agencies, is 16 the baseline the same for both of them, or have they 17 sort of gotten -- I don't know if they got started 18 exactly together, so if one jump-started the other -- is the baseline data the same? 19

MR. CAMERON: The baseline will be different for the two projects. The ICTF is up and running with existing projects, so its baseline takes into account one point in time that activity going on at that terminal. The BNSF project, on the other hand, is really the baseline of the existing activities that are

Page 19

Page 17

we'll have a document next spring for review.

Complications with this document is that it is very complex. As you know, there's two intermodal yards being assessed at the same time right next to each other, and that's added significant complications, plus the work on the traffic and also coordination issues with two different lead agencies as you would preparing separate EIR documents. So that's largely responsible for the project delay. I hope that responds to your question.

CHAIRMAN SRAMEK: Yeah, thank you. DR. APPY: Okay. Will there be additional hurdles planned in going forward? We always get asked to nail down the exact date when an EIR will come out. It is very difficult to predict because we're always coming up with new issues that we have to deal with. We do think we will have it out next spring, but whether 18 it's April 2 or April 28, it's something difficult for us to predict right now, so we are just saying the spring.

I don't know if there's any other specific questions you might have at this time. That kind of concludes our brief presentation.

MS. MISCIKOWSKI: Ralph, you did ask -- you did say something about there is some new update or new data

going on in that land which is, for instance, Cal 2 Cartage is a major transporter that is out there, so 3 they kind of form a baseline for the project.

So they are very different baselines, but the thing that needs to be really very similar are the assumptions that we use, traffic assumptions, air quality modeling assumptions in all those, and it's really great having that interaction working on the document because that will be certainly questionable on the assumptions used in the final analysis.

MS. KNATZ: Ralph, at one of the earlier meetings we talked about doing one of these meetings -talking about what the alternatives were that are in the document, and so it sounds like you're far enough along that you've identified what the alternatives are. I 16 didn't know. I was kind of expecting your usual PowerPoint show now, so . . .

DR. APPY: We are looking, and that's actually one of the things we're still working on. As you recall. CEOA documents are a little bit different than NEPA documents. We do a lot of NEPA documents for the two ports that require a co-equal analysis of all the different alternatives. These documents, specific CEQA documents, are going to be a little different from that.

We still will be looking at some comparisons.

1

21

22

23

24

25

16

17

18

19

21

22

23

24

We're looking at the no-project alternative, the proposed project, and a reduced project alternative, and 3 now we are in discussions on some other alternatives 4 including alternative technologies that could be applied 5 and also use of on-dock rail -- maximizing on-dock rail 6 as an alternative. And so some of those we're still discussing the feasibility of those.

8

9

12

13

14

15

16

18

19

20

21

13

14

15

16

17

18

19

20

22

23

24

And just to be honest, one of the complications with the on-dock rail, it's one of our project assumptions is that the on-dock rail would be maximized at the ports. So that is a basic assumption. So in some regards, that kind of reduces it as an alternative, but we still think we need to have that discussion, full analysis and discussion, so that everybody is aware of all the details of on-dock rail, how much can we cram onto on-dock rail so that they're comfortable with the facts that that has been considered as an issue.

CHAIRMAN SRAMEK: How are you handling the SF47 in the EIR?

DR. APPY: I think we're being -- we're looking at two different analyses on that with and without the modernization.

CHAIRMAN SRAMEK: Okay. Any further questions on this? Can we go to public comments now?

Rick, do you have anything? We may come after

Long Beach Association.

CHAIRMAN SRAMEK: Do you want to call the second person?

MR. THIESSEN: Yes, following Mr. Cross will be Elena Rodriguez. She is a West Long Beach resident. And following Ms. Rodriguez will be Ms. Lopez.

7 MR. CROSS: First of all, on behalf of the West 8 Long Beach Neighborhood Association, I would like to welcome the commissioners from both ports for the West 10 Long Beach, and I would like to thank you for bringing 11 the meeting over here. Our neighborhood has some direct 12 impacts from the ICTF terminal which you guys are 13 responsible for. And we do know something about 14 pollution in our area. We just received a prestigious 15 award from the AQMD for community service keeping our 16 air clean. So we do know a little bit. We have been 17 fighting together for years.

As you know, I'm opposed to the expansion of this project, and I've been since day one. And I'm opposed to building the SCIG project because of the major health impacts imposed on the community. We have some of the highest asthma rates in the neighborhood.

The ICTF yard is currently the third dirtiest rail yard in the state of California according to the California Air Resources Board, and they tell us that

Page 23

Page 21

you if we have a lot of questions.

MR. STEINKE: I would like to ask Dr. Appy if anybody from AQMD would like to make any comments or hold those comments or we don't need any comments from them at this point. Since they are in the audience, I didn't want, you know, to have them not contribute some comments that they wanted to make. It looks like they are comfortable not making comments at this point. Okay.

MR. CAMERON: We talked to AQMD about supporting SRA on any follow-up questions by the board members or the public.

CHAIRMAN SRAMEK: And I'd also like to just quickly recognize the Long Beach Council member, Rae Gabelich.

Thank you. Okay. Mr. Thiessen, go ahead. Remember that you have three minutes so whenever you come up, just identify yourself.

MR. THIESSEN: Mr. Chairman, we're going to go through the order of comment cards as they've been received, and I would ask any of the speakers who have not filled out a comment card, please go to the back and fill one out. And we'll have it brought up here, and you'll have your opportunity in the order it's received.

The first person is John Cross from the West

we've got to spend \$400-and-something million to clean

it up. But we've got to expand it when we clean it up. It says it will cost about 700,000 lifts a year for

4 about 1.6 million, and that's quite a few lifts. And if

5 they build a SCIG project which is a stopgap, that's

6 another 1.5 million lifts. That's quite a few lifts.

Now, I want to challenge Mr. Appy because I 8 know he did some research because I heard him say Cal Cartage, but I don't think Cal Cartage is going to have 10 anywhere near the truck traffic that the SCIG project 11 will. None whatsoever. And they're claiming that 12 they're cleaning up because they will have the clean 13 truck program. We will have clean trucks at the

facility. But I don't think it's going to be anywhere 15 near what the SCIG project will be.

So I want to use that as a comparison. We're talking about maybe a million, maybe a hundred thousand a year.

But we're opposed to this project because of the health issues that it brings on our kids in our neighborhood, and this project can't go through as it is.

But the ports should both be commended for putting more on-dock rail. I know L.A. is putting on-dock rail. Long Beach is putting more on-dock rail.

7

8

11

12

25

12

13

14

15

16

17

If the downturn in the cargo traffic going through the 2 Ports of L.A. and Long Beach -- it may not come back for 3 a long time. And with on-dock rail they may be able to handle what's coming through the Port of Long Beach or Port of L.A.

If ICTF wants to expend a million or 900,000 lifts a year, and the middle harbor project by itself would be 1 million like the numbers I've read, why should you guys have to expand? Why don't they just clean up their facility? But they said no, we've got to expand our facility to clean it up.

21

22

23

You know, if I've got a house that's dirty, I don't have to remodel the house and tear it down and redo it to clean it up. You can clean it up without tearing it down and remodeling it, and they can do that 16 to their facility. Clean it up so we have clean air for our kids and for our future kids that come along and the grandkids.

But these projects -- neither one of them are good. And the ports should both be commended for on-dock rail, and that's what we always asked for all along is on-dock rail. There's property out there, and if the expansion comes through, you know, it's going to affect our neighborhoods and destroy our neighborhoods. Thank you.

CHAIRMAN SRAMEK: Thank you, Mr. Cross. MR. THIESSEN: Next speaker is Elena Rodriguez. THE INTERPRETER: My name is Melissa, and I

will be translating.

MS. RODRIGUEZ: Good evening, my name is Elena Rodriguez.

7 THE REPORTER: Can you speak into the 8 microphone more, please.

THE INTERPRETER: Okay.

MS. RODRIGUEZ: Thank you for allowing me to be 11 here today. I live in West Long Beach, and now we're seeing the effects on the people in our community. We have -- there are powerful reasons as to why this project should not be going on.

Our children are suffering the consequences to their exposure, and they are -- they have certain illnesses that have been medical -- physical problems -excuse me -- that suggest that they have asthma. There is evidence that there is -- there is an impact, a significant impact and -- a significant impact in our children -- I'm sorry -- associated with cancer due to the expansion of the ICTF.

The electrification of the rail yards and the promotion of the on-dock rail on the ICTF is a good thing to reduce the contamination in the air. The air

pollution should clean -- clean solution to the pollution.

3 This is my community, and we do not want any of these projects that are going to cause -- in our 5 community that are going to cause damage, and that is 6 due to the expansion of the ICTF. Thank you.

CHAIRMAN SRAMEK: Thank you.

MR. THIESSEN: Next speaker is Maria Lopez.

9 And following her is Maria Reyes. 10

THE INTERPRETER: My name is --THE REPORTER: Pardon?

THE INTERPRETER: My name is America, and I'll

13 be translating for Ms. Lopez.

14 MS. LOPEZ: Good evening. My name is Yolanda 15 Lopez, and I live in Long Beach. My daughter is 28 16 years old, and she's been taking medicine for the asthma 17 for 20 years. It is true that the medicine is saving --18 has helped her, but it has also caused her damage as 19 well. For using the space for a long period of time, it 20 also has caused her some damages to the extent that her 21 doctor has given her a machine to take home and in the 22 event has an asthma attack. Because now she has to go 23 into the hospital for the treatment, so she can do the treatment at home.

On one occasion the doctor had given her a

Page 27

treatment, but the treatment had caused her some damage and made her swell. The classrooms were that it looks 3 like she was gaining weight -- that she was gaining 4 weight, but that also was the treatment.

5 The lives of children, adults, and youth that 6 have asthma is a really difficult life. So even being when they're happy, they're sad, they're stressed, they're nervous, they get asthma attacks. Because they get an asthma attack and their lungs starts to tighten, 10 and it's difficult for them to breathe. I thank you for 11 your attention.

CHAIRMAN SRAMEK: Thank you.

MR. THIESSEN: Next speaker is Maria Reyes followed by Roberto Reyes.

MS. REYES: Good evening. My name is Maria Reves --

THE REPORTER: I can't hear you. Pull it 18 towards you, please.

19 MS. REYES: We are affected, and perhaps we are if we live in the west side of Long Beach. For example, 21 I live first by -- I live by the on-dock rails, and 22 sometimes the transportation -- and for some time they

23 would continually stay on the dock -- on the dock rails, 24

and terrible smells begin to come out from the

containers. And also an employee of the people that I

9

I don't think it's necessary for the ICTF to expand. Excuse me. I don't think it's necessary to expand the yard with the trucks passing by the school. I could say much more. I could say much more to tell the leadership for this problem. I haven't seen any improvement in the area. It is only promises. Thank you for your time.

CHAIRMAN SRAMEK: Thank you. MR. THIESSEN: Roberto Reyes. Next speaker is Roberto Reyes.

MR. REYES: Good evening. My name is Roberto Reyes, and I'm a resident of West Long Beach. And I have some few questions which have previously been answered, but I have different wording for it. How does the ICTF plan on making more jobs available for the community if imports and exports are lowering then? How does the ICTF plan on reducing the outcome of the pollution that will come out of the building expansion? Is there any alternative options instead of the expansion of the ICTF for what will create the most profit without caring about the outcome and effects it will have on our environment?

And this is my sister -- she told me that she

getting worse each year with their lung problems.

2 So what I would like to know, I've heard said many times that magnetic rail has been offered for us to get at the port at no extra charge to the port and for transportation. Someone has volunteered the monies and the grants for putting this in and getting it going, but yet I have not heard it mentioned that it was going into

And I would like to know how long is it going

10 to take for us to get a truly clean air method of transporting the goods from the port to other 12 transportation facilities so that those of us that 13 afford to live here because we cannot afford to move --14 we're living in subsidized housing -- or others that are 15 working and living in conditions where they can't afford 16 to move, they can't afford to change their jobs, and so 17 forth.

We are forced to live in one of the most polluted areas in our state. We need to have something done to get the trucks off of our highway, out of my backyard. Living within three blocks of the 710 freeway is no fun place to live. It's equally to middle harbor and right across the freeway.

This is going to affect my life. Yes, another 15 to 20 years, things will be cleaner. But is there

anything being done that will make it cleaner now? I

Page 29

Page 31

Page 30

goes to the school where the ICTF wants to expand. She notices that at her school there's a lot of things that are going on, and finally I have a chance to help my school, and the problem is that children have to spend money on regular exercises for their class, and now it will cost more money for providing more exercise instead of programs that can be used with this money. So they're spending money on exercise because of the amount of pollution that's coming out from the trucks in the area. And she wondered, like, Why don't they expand somewhere else? And thank you for your time.

CHAIRMAN SRAMEK: Thank you very much. MR. THIESSEN: Mr. Chairman, we have five more speakers signed up. The next speaker is Ben Rockwell. Following Mr. Rockwell is Evelyn Knight.

MR. ROCKWELL: Thank you. Good evening, ladies and gentlemen. My name is Ben Rockwell. I do live here in Long Beach.

As most of you already know, I do have severe 20 lung problems, in fact, less than 40 percent of normal lung functions. There are many people in Long Beach 22 that have these problems. Many, many people that must 23 use breathing machines at night. Many of us are on 24 oxygen as well as all the kids that have their asthma, and people with severe asthma. Some of my friends are

know there's some mitigations done, but even there is no guarantee. We haven't heard yet when we can start applying for the mitigation funds so that we can get air filters, air cleaners out to those persons who really need them the most. We don't know when they're going to be able to have them so that our kids, our seniors, and others that are affected by poor lungs and pulmonary problems will be able to live a better, cleaner, healthier life and be able to breathe clean air at night 11 or during the daytime without wondering how many days, 12 how many months, how many years before I take my last 13 breath because my lungs just give out; it's been too 14 much. Thank you.

CHAIRMAN SRAMEK: Thank you, Mr. Rockwell. Before Evelyn comes up, I'd just like to -- you want to talk about that, Rick?

18 MR. CAMERON: Mr. Rockwell is referring to the 19 Port of Long Beach mitigation program that was developed 20 as part of the middle harbor program that the Port of 21 Long Beach is currently working on the existing materials, and we're hoping to have that specific 23 materials out by the end of the year and also is anticipated for cleaning up the atmosphere. It's independent from this JPA ICTF project. I just want to

MR. THIESSEN: Following Evelyn Knight would be Mr. Jim Larson.

MS. KNIGHT: Good evening, members of the Joint Powers Authority commission. My name is Evelyn Knight, and I'm a long-time -- I'm a member of the Westside Association as well as the Interfaith Community Organization. And I'm a long-time pollution-experiencing resident of the West Side, and also my family who experiences asthma and other disorders due to the pollution.

I want you leaders to adopt a pollution-free strategy for the residents of the Long Beach. I stand ready to work diligently with anyone who's going to make these efforts. I would like to see a strategy to be driven by a realistic and commonsense approach to questions like, Do we need this massive expansion of the railroad in our neighborhood and all of the problems it brings when we have a viable option of on-dock rail to handle cargo? Do we need more pollution when the railroad has refused to clean up its existing problems that it has created and the mess and just really ignored

the views of our community to have pollution-free environment?

This is what the community needs. Do we have the needed data to support more expansion and the consequences of this activity on the neighborhood and the economy? Do we need to expand the railroad's activities when we have the deepest downturn in our economy since the '30s? On October 17th the L.A. Times reported a deep dive in imports in Long Beach and L.A. and said some cargo firms may go under. Do we need to be in a deep hold to make bad decisions and waste resources in this time of uncertainty?

We need to use this time to take a deep breath of clean air and get our polluted house in order. Can we do this together, please, and save our lives and our economy? Have we looked at all of the things that we 17 can do and we should be doing, or are we just sort of run on just do something just because we've got something going on?

We need to really think about what you're doing and save our lives and be about the business of people, our neighborhood, our community, and not just think of someone who wants to lay just another egg, and we give all to him. Thank you.

CHAIRMAN SRAMEK: Thank you.

1 MR. THIESSEN: Following Jim Larson will be 2 Angelo Logan, and following Mr. Logan will be Maria Hernandez.

MR. LARSON: Good evening. My name is James 5 Larson, and I'm a long-time resident in the west side of Long Beach, and a parent of a child that goes to St. Lucy's right in that area of the freeway and the -- you know, close to the facility, the ICTF facility.

You are the ICTF Joint Powers Authority, and you have the power in that facility to decide the fate of this project. If I may steal a line from a movie, with great power comes great responsibilities. So I ask you, Who are you responsible to? Are you responsible to the railroad, to the board, or to the people of this community?

As a parent I have power and authority with my wife and my house. If my child leaves his toys out, won't take care of his toys, and then come to me and demands that I buy him new toys, I'm responsible to put my foot down, to tell him, he's not going to get new toys until he takes care of what he has.

This might be an oversimplified analogy, but that spoiled child who won't clean up his room is Union Pacific Railroad. They're right here in this community. They want to expand, but they won't clean up what they

Page 35

Page 34

already have unless they are allowed to expand.

They came in here a year ago, sat right where you're sitting. I was standing right where I am, and they told me that. They won't clean up the facility unless they are allowed to expand. You offered them credits and left. You gave them basically free money if they would clean up the facility as it is right now, and they declined that.

They are the spoiled child. They cannot be

allowed to bully this neighborhood any farther. They need to be made responsible for what they already have 12 before we would consider expanding. No way are you allowed to do this, okay, not in private business. Nowhere are you allowed to ruthlessly behave and then be given some promise that they would change their behavior if they were given, you know, credit and things like that.

I propose that this board table the EIR consideration until, one, they clean up and go green on what they already have, and two, the level of containers coming into the port warrant an expansion, and that's my suggestion. I hope you take it to heart, and thank you.

CHAIRMAN SRAMEK: Thank you very much. MR. LOGAN: Hello, Mr. Chairman and members of the board. My name is Angelo Logan, and I was going to

1 come up here and suggest specific things related to the 2 EIR. But after hearing the previous speaker, I sort of

3 feel like he made some very good points that, one, the 4 railroad should be required to clean up their mess, not

just the ICTF, but also at the existing rail yards that show high cancer risk in the studies on the Air

Resources Board and the AQMD. So they should be required to reduce their emissions and reduce their 9 cancer risk.

And that before considering expansion of ICTF, that we should really look at the through port -- at the two ports and see if they really want the expansion of the facility. And so I think that those ideas that were expressed by the previous speaker are part of the effect and solution and best way to move forward.

But if you're going to continue to conduct the EIR, I would make some specific suggestions as related to the throughplex -- I'll use the first one -- and that is that in the analysis that you should really look at the needs and purpose of this project and relate that to the latest numbers in terms of throughput at the port. We can compare those numbers and the needs and purpose and analyze them and compare them to the impact to the local community, and weigh that out and figure out the effect. The project still needs to meet the purposes of

Page 37

the initial project.

10

11

12

13

15

16

17

18

19

21

22

23

24

1

2

13

15

16

20

22

23

24

Also I really feel that the project should look at are they not really looking at cumulative impacts. I was talking to staff earlier they're looking at -assuming the focus stays on the ICTF EIR, not currently but at the same time, so we can look at cumulative impacts of both those projects combined as well as the truck traffic they will generate.

Also in the analysis of the alternatives, we should not just look at maximizing on-dock rail, but looking at maximizing on-dock rail with new technology such as like underground stacking technologies at the port as an alternative analysis, and we should also look at regional impacts from promoting the increase in truck traffic and locomotive traffic throughout the region. and if the analysis existing has truck pollution, does the assumptions in the reduction of truck pollution assume that the ICTF is going to be completely successful clean truck program and looking at the port challenges and the different settlements, see if assumptions with the clean truck program is adequate with the assumption of this analogy. Thank you.

CHAIRMAN SRAMEK: Thank you. MR. THIESSEN: Okay. Mary Hernandez, and then following Mary is our last speaker of the night, Jesse

1 Marquez.

2

3

23

24

19

MS. HERNANDEZ: My name is Mary Hernandez. I live on the west side all -- practically all my life. I'm 76 years old.

5 And I want you to put the trains in the port; 6 don't bring them here in the west side and the people here. The thing at night -- I live on Haze, close to that where the trains go by, over there by Freeway 103. I can hear them all night, crunching and their motors running. Can you imagine that? If you did expand, can you imagine that?

12 I wish to leave -- keep the trains in the port, 13 Los Angeles and Long Beach, because it affects everybody 14 here in the community. And leave things alone; don't 15 expand. It affects us people. Can you imagine, kids 16 get sick with asthma and the kids at Hudson School, St. Lucy's, Webster School. Can you imagine to run next 18 door? These kids, they have their health, and Hudson --19 they have to have air filters. Then what? All you have 20 to do -- all these people have to make money. Forget 21 about the west side. That can't be. Don't expand. Thank you. 22

CHAIRMAN SRAMEK: Thank you, Mary. MR. MARQUEZ: Good evening, members. My name is Jesse Marquez, and I'm executive director and founder

Page 39

Page 38

of the Coalition for a Safe Environment. We have members in over 25 cities in Southern California and especially throughout the harbor community.

At this point I'd like to bring up is that we would like to request that ICTF that you have the authority that since you have not elected to have a fifth voting member, that we the public be allowed to hold a public hearing to nominate and vote for a public member to fill that position. We feel that it's irresponsible to not have a full body of authority who could represent the public interest. In the past there 12 has been no public member of the JPA, and we feel that 13 now is the time to do that. You have potentially 14 decided and voted not to do that. And we're asking that we be provided the opportunity to do that. Even if it 16 requires some type of rule, regulation, or procedure, 17 then we would like to find out what is that procedure to 18 do that.

The course of the environment does not support the expansion of the ICTF terminal when there are other feasible alternatives. As an example of that, even 22 on-dock rail currently at both ports is not being 23 maximized. The Alameda Corridor which was designed to 24 handle freight is not being maximized. Even today, even last year, it was only at 60, 65 percent, and it's been
