TO: Governing Board, Intermodal Container Transfer Facility Joint Powers Authority

FROM: Douglas A. Thiessen, Executive Director

SUBJECT: Southern California Edison License Agreement

The existing Soundwall License Agreement located North of Willow/Sepulveda, Long Beach, California, expired September 30, 2010. The current agreement commencing October 2010 and ending on the last day of September 2015 requires full term payment in the sum of \$2,300 and evidence of insurance. The terms of the agreement are set forth in the attached SCE proposed License Agreement.

It is recommended that the Governing Board approve a License Agreement with Southern California Edison (SCE) for the licensing of an existing sound wall located on SCE property adjacent to the ICTF property.

It is also recommended that the Board make the following finding:
"The Board finds the activity is a licensing of an existing sound wall involving no change to the structure or expansion of an existing use, and as such is exempt under CEQA Guidelines Section 15301."

Licensee will peaceably quit, surrender and, prior to termination date, restore the Property to a condition satisfactory to the Licensor. Termination, cancellation or expiration does not release Licensee from any liability or obligation (indemnity or otherwise) which Licensee may have incurred. Licensee's continued presence after termination shall be deemed a trespass.

28. Events of Default: The occurrence of any of the following shall constitute a material default and breach of this Agreement by Licensee:

- (h) Any case, proceeding or other action brought against Licensee seeking any of the relief mentioned in "clause g" of this Article which has not been stayed or dismissed within thirty (30) days after the commencement thereof.

29. Remedies: In the event of any default by Licensee, then in addition to any other remedies available to Licensor at law or in equity, Licensor shall have the immediate option to terminate this Agreement and all rights of Licensee hereunder by giving written notice of termination to Licensee. Upon termination, Licensor will have the right to remove Licensee's personal property from the Property, including but not limited to, buildings, structures and fixtures. In addition, Licensor may immediately recover from Licensee all amounts due and owing hereunder, plus interest at the maximum rate permitted by law on such amounts until paid, as well as any other amount necessary to compensate Licensor for all the detriment proximately caused by Licensee's failure to perform its obligations under this Agreement.

30. Non-Possessory Interest: Licensor retains full possession of the Property and Licensee will not acquire any interest temporary, permanent, irrevocable, possessory or otherwise by reason of this Agreement, or by the exercise of the permission given herein. Licensee will make no claim to any such interest. Any violation of this provision will immediately void and terminate this Agreement.

31. Waiver: No waiver by Licensor of any provision hereof shall be deemed a waiver of any other provision hereof or of any subsequent breach by Licensee of the same or any other provision. Licensor's consent to or approval of any act shall not be deemed to render unnecessary the obtaining of Licensor's consent to or approval of any subsequent act by Licensee.

32. Authority: This Agreement is pursuant to the authority of and upon, and is subject to the conditions prescribed by General Order No. 69-C of the Public Utilities Commission of the State of

California dated and effective July 10, 1985, which General Order No. 69-C, by this reference, is hereby incorporated herein and made a part hereof.

33. Attorneys' Fees: In the event of any action, suit or proceeding against the other, related to this Agreement, or any of the matters contained herein, the successful party in such action, suit or proceeding shall be entitled to recover from the other party reasonable attorney fees incurred.

34. Electric and Magnetic Fields ("EMF"): There are numerous sources of power frequency electric and magnetic field ("EMF"), including household or building wiring, electrical appliances and electric power transmission and distribution facilities. There have been numerous scientific studies about the potential health effects of EMF. Interest in a potential link between long-term exposures to EMF and certain diseases is based on the combination of this scientific research and public concerns.

While some 30 years of research have not established EMF as a health hazard, some health authorities have identified magnetic field exposures as a possible human carcinogen. Many of the questions about specific diseases have been successfully resolved due to an aggressive international research program. However, potentially important public health questions remain about whether there is a link between EMF exposures in homes or work and some diseases including childhood leukemia and a variety of other adult diseases (e.g. adult cancers and miscarriages). While scientific research is continuing on a wide range of questions relating to exposures at both work and in our communities, a quick resolution of the remaining scientific uncertainties is not expected.

Since Licensee plans to license or otherwise enter SCE's property that is in close proximity to SCE's electric facilities, SCE wants to share with Licensee and those who may enter the property under this agreement, the information available about EMF. Accordingly, SCE has attached to this document a brochure that explains some basic facts about EMF and that describes SCE's policy on EMF. SCE also encourages Licensee to obtain other information as needed to assist in understanding the EMF with respect to the planned use of this property.
